

Interactive Dashboards

An Executive Presentation Tool

Interactive Dashboards empower executives to analyze and present key financial and statistical information like never before. Imagine a single, graphical interface with point and click access to all the important measures that drives corporate performance. **Finally, you are in the driver's seat!**

With Interactive Dashboards you can deliver important information from systems like Microsoft Dynamics, Oracle, SAP and Enterprise Reporting in a compelling, user-friendly and interactive way.

Benefits

- Ideal presentation and analysis tool for budgets, financials and statistical information
- High impact analytical interface that is easily adoptable by managers and executives
- Completely configurable layout based on management needs and preferences
- Point and click navigation and analysis
