- Schedule Individual Payments
- Recurring Payments with AutoPay
- Recurring Invoicing
- Email Receipts to Customers
- Installment Payments

ePay Advantage

Improve Cash Flow with Online Bill Pay for Microsoft Dynamics GP

ePay Advantage offers the latest online payment technology for enterprises that want to provide their customers with the convenience of online billing and payment collection. It supports both Business to Business (B2B) and Business to Consumer (B2C) for the Biller Direct Model within Electronic Bill Presentment and Payment Models. This means that the vendor sends invoice notification directly to the customer. The customer can log on to the vendor's website, browse their invoices, process payments, and confirm payments.

This solution integrates with Microsoft Dynamics GP to automate cash receipt entry and provides real-time payment processing, eliminating double data entry with improved cash flow. It can also be easily integrated with your existing website or Nodus' eStore Solution Stack to accept payments for open account customers.

Go Paperless with Electronic Billing and Payment Collection

For many companies, handling invoices is still an old-fashioned paper process despite the fact that customers' experience is becoming more web-based every day. With ePay Advantage, Microsoft Dynamics GP users can send invoice notifications electronically to their customers and direct them to the secured ePay Advantage site to pay for their invoices electronically. The result is a streamlined, automated process that reduces the billing cycle and collection cost, improves efficiency and cash flow.

ePay Advantage automatically applies payments to the invoices and integrates directly with cash management for better cash position visibility. In addition, it lets you interact with your customers on payment shortfalls or overcharges with complete document trails. Your customers will gain the convenience to check their invoices and payment history at their leisure.

Recurring Payment Options for Subscription Base Service Business

ePay Advantage offers fast and easy process for subscription base service business to generate recurring invoices with the option of automatically accepts payments based on specified frequency. Customers can set up their preferences to automatically take the payment periodically or sign on the site to pay electronically from customer's credit card or electronic checks based on customers preferences.

ePay Advantage accepts credit cards or electronic checks as payment methods. The payment transaction is fast and secure with payment captured immediately. The transaction data is then seamlessly transferred to Microsoft Dynamics GP for auto-posting to your cash management system.

Installment Plan Payments

ePay Advantage's optional Installment Plan is another easy add-on to allow the user to set up installment plan payment for their customers. The user can specify the down payment requirement, the number of payments and the interest rate. The software will automatically calculate the amount of each installment payment, and their customers can log in the secured site to pay for each installed payment electronically. At the end of this self-served payment, the transaction data is seamlessly sent to Microsoft Dynamics GP for auto-posting to your cash management system.

CUSTOMER SUCCESS STORIES

"Using Nodus Technologies we've migrated to a paperless office. Their powerful solutions simplify the way we process credit cards and enables us to accept payments effectively."
