

KEY BENEFITS

Advanced Architecture

eStore Solution Stack leverages SOA with web service architecture to ensure flexibility of network deployment topology and extensibility to collaborate with other applications. This enables the webstore to continue to take orders even if the ERP is temporarily unavailable.

Rich B2B and B2C Features

Superior e-commerce functionalities for B2B and B2C sites; Supports both CSS and AJAX for rich and flexible web page design; User definable meta-tags for search engine optimization; Google analytics to track marketing campaigns.

Seamless Integration

Webstore is seamlessly integrated with Microsoft Dynamics GP with real time SOP auto-generation, customer information, inventory and pricing update. It is an "ERP eStore in a box".

Redundancy and Load Balancing

With its SOA architecture, eStore Solution Stack lets you deploy web traffic load balancing and redundancy with ease for high volume e-commerce sites.

Secured ePayment Handling

Secure payment wallet for credit card and electronic checks for user convenience; real time monitoring of open account credit limit; credit card number validation prior to submittal; AVS, CVV2 fraud protection; Level 2 and Level 3 support; add-on VeriSign Secure Site Pro True 128 SSL certificate and HackerSafe Service Mark to further enhance consumer trust.

Product Features at a glance:

- B2B / B2C E-Commerce Integration
- Real-Time Payment Processing
- Accept Multiple Payment Types
- Automated Sales Order Entry
- Synchronized Customer Data with GP

eStore Solution Stack

Take E-Commerce to the Next Level with MS Dynamics GP Integration

For countless companies, handling orders initiated from a webstore is a time-consuming, inefficient process. To overcome the challenges, Nodus created the eStore Solution Stack, providing everything you need to establish an e-commerce webstore, including:

- Further automate inventory, purchasing and back end fulfillment management.
- Use a full-featured, customizable shopping cart that uses Nodus' Credit Card Advantage for e-payments
- Take advantage of GP integration middleware and eConnect run-time license and Nodus' powerful eStore Advantage GP integration middleware

Streamline Your Business and Automate Web Orders

eStore Solution Stack creates a fluid electronic payment process by connecting webstores directly to Microsoft Dynamics GP so you can automate web orders, improve operational efficiency, and increase net margins. Improve your bottom line with order tracking and payment processing integrated with your back office ERP solution.

With this solution you will eliminate double-entry errors and free resources previously dedicated to manual order processing. You'll discover streamlined order processing that helps you gain sharp control over sales orders, cash receipts, inventory items, and customer information.

Get Up-to-Speed with Your E-Commerce Processing

In today's fast-paced e-commerce world, time is money - and you can't afford to be held up by slow transaction processing. eStore Solution Stack ensures smooth, fast, and accurate data transfer. The superior integration and flexibility of this e-commerce solution enables you to integrate web orders and electronic payments with multiple payment gateways, processors, and back office environments.

Add Nodus' eSecurity Services to Help Your Business Build Trust

The security of your e-commerce website is the backbone of trust for your e-business. As a complement to eStore Solution Stack, Nodus eSecurity Services help merchants increase their online revenues, as well as meet a variety of mandated and recommended government and industry data security standards. When you choose to add VeriSign Secure Site Pro: True 128-Bit SSL Certificates or ScanAlert's HackerSafe Certification, your company can achieve the trust you need to drive growth in your e-commerce business.

CUSTOMER SUCCESS STORIES

"eStore Solution Stack empowers retailers like Superior Tattoo, to efficiently serve their customers and effectively manage inventory and sales from e-commerce and physical storefronts with their Microsoft Dynamics GP. This gives multi-channel retailers a competitive advantage across every sales channel."

- Mink LeVoy, Microsoft Dynamics GP West Region Director, Tectura
